You must make arrangements to pick up your turkeys on **Thursday, March 14th at the Extension Office between the hours of 9:00am and 4:00pm**. Please bring a box to put them in and carefully read the information provided. An additional fact sheet is included with more information that you may want to consider when raising day old turkeys.

Before raising broilers for competition, you should ask yourself one question: "Am I up to the challenge of caring for turkeys for several months?" Birds require regular care and feeding throughout their lives. Raising birds requires an extra commitment of time, patience, dedication and concern for the animals involved. Persons who cannot put forth the effort required should probably not begin the process.

Planning and preparing adequate facilities before the arrival of the birds allows birds to adapt to their new environment with a minimum amount of stress. Facilities should provide birds with ample space, plenty of ventilation, proper temperature and adequate protection from the elements and predators. While good facilities and feed which meets the nutritional needs of the bird are crucial for rapid growth, poor management or bird care can undermine all the previous efforts. Checking the birds, particularly at times of the day when the temperature is changing, and making appropriate adjustments are the only ways a proper environment can be maintained.

Should I take TURKEYS as a 4-H project?

Choosing to take a livestock project in 4-H should involve sound decision-making. This fact sheet provides basic information to help you make a good decision.

SPACE NEEDED

- 5 - 10 square feet per finished turkey in confinement

COMFORT ZONE

- 100° F the first week; lower 5 ° each week to 70 ° for optimal performance

WATER REQUIREMENTS

- Access to clean, fresh, cool water is critical
- 1 pint - 2 gallons/day (increases as birds grow)

FEED CONSIDERATIONS

- Will eat approximately .34 - 11 pounds of feed per week
- Will gain approximately .1 - .3 pounds per day (Average Daily Gain or ADG)
- Needs approximately 2 – 2.5 pounds of feed per pound of gain (Feed Efficiency)

MARKET CONSIDERATIONS

- Hens should weigh 25 – 27 pounds when finished
- Toms should weigh 42 – 47 pounds when finished
- Should be finished at 21 - 22 weeks of age

BUDGETING

- Approximate purchase cost is \$6.00 each at hatching
- Projected market price is \$1.00 per pound
- Projected feed cost is around \$30.00 and includes:
 - Turkey Starter (complete feed)
 - Turkey Grower (complete feed)

Prepared by Bonnie Malone, Extension Educator 4-H, Huron County, Ohio and Vicki Schwartz, Associate State Leader, Ohio 4-H.
